CHIPPING NORTON.	NAPHILL UNITED.
DIDCOT AND NORTHBOURNE.	WYCOMBE EXCELSIOR.

*Proving its worth!*

The universal acceptance and endorsement of the New Valve Action by the leading players is the outstanding achievement of this remarkable advance in construction.

Designed to give the finest tonal qualities, perfectly balanced and beautifully finished, the New Suspended Valve Action Cornet has no rival. The Valve, instead of resting on an open coiled spring, is suspended from a closed one, with the result that the spring is always being pulled. This obviates the wear and noise of the spring—one so often gets with the old action—and enables the valve to move up and down without rubbing against its guides.

The constant search for improvement by our skilled craftsmen has enabled us to produce an instrument that in construction and performance is nearer perfection than any type yet evolved—and players are proving it.
